

Your dream bathroom – the 8 Top Tips to get you started

CHRIS JARVIS

PLUMBING & BATHROOM RENOVATIONS
AWARD WINNING BATHROOMS

Built by our family for yours

Get Inspiration

Start collecting a scrapbook of ideas from magazines, etc; or visit display homes. That's a great way to see the latest colours and trends in a real bathroom-main and ensuite. Check the laundries, too for layout and colour palette. It makes sense to get all yours renovated at the same time

Get a Bathroom Health Check

Before you start renovating get a professional to check your bathroom for asbestos or hazardous materials

Get a Floor Plan Design from a bathroom professional

A detailed design to scale will incorporate your ideas and allow for the greatest functionality and efficient use of space. And professionals know the tricks to save space yet still deliver the functionality you want. It's your chance to discover cost-effective design options

Get the specifications

The floor plan will provide you with all the specifications you need to choose the correct size vanity, shower, bath, etc, from your bathroom supply retailer. You'll also know how many tiles you'll need, so you can choose tiles to suit your budget

Get a list of Brisbanes' top suppliers

Reliable, professional retailers who know their stuff will guide you through the best value options when it comes to fittings. It's not just the look, it's energy and water saving options and the long-term performance and reliability.

**Remember – where you source the products and fittings you use in your bathroom can affect your eligibility for building insurances and warranties should you ever need to claim*

Get a build quote on that Floor Plan Design

Using fully licenced tradespeople

It's not just about safety, but a completed bathroom needs to achieve the compliance certificate required for warranties, local regulations and home insurance. Short cuts increase the risk of plumbing disasters, structural damage and increased fire risk. And these possible hazards cost time and money to fix

How do I know if they are licenced?

You can check every tradespersons' licence details online before you start your project. For Queenslanders it's the Queensland Building and Construction Commission **www.qbcc.qld.gov.au**

Checklist-finding the best professional tradies to build your bathroom

Do they have a multi-skilled team?

Do they supply a comprehensive service including project managing any additional trades?

Are they qualified to do your Bathroom Health Check?

Do they supply the list of Brisbane's top suppliers?

Are they recognised as the industry's top performer by the Plumbing Industry's own professional association-the Master Plumbers' Association of Qld-MPAQ?

Are they industry recognised for Technical and Design Excellence?

Did they build the Best Bathroom in Qld - as recognised by the national Housing Industry Association of Australia (HIA) awards?

Who is Brisbanes' Chris Jarvis?

Chris Jarvis is the team leader for his family business Chris Jarvis Plumbing and Bathroom Renovations. Together with his 3 sons and one daughter, this team is at the top of their game.

With Chris Jarvis-the team that wins the award is the team that will build your bathroom.

The latest Queensland Award is the HIA 2013 Award Best Bathroom Renovation in Qld. And now crowned bathroom masters by their peers- the Master Plumbers Association- winning the 2013 Master Plumbers' Award for Technical Excellence Qld for a domestic renovation.
